SOCIETY

Mark your calendars:

March 20-25, 2011 (Sunday – Friday)

***Stationary Source Sampling & Analysis for Air
Pollutants 35th Conference!***

The Westward Look Resort

Tucson, Arizona

The Source Evaluation Society is completing plans for the 35th SSSAAP Conference to be held at the Westward Look Resort in Tucson, Arizona. This international conference will have evening and morning sessions, Sunday through Friday, March 20-25, 2011. The conference format includes technical presentations and incorporates ample opportunities for meaningful discussions. This conference provides a unique opportunity for discussions with emissions measurement professionals from industrial source operators, regulatory agencies, and consulting/engineering firms in a highly interactive setting.

Technical sessions will focus on regulatory development, evolving testing and measurement issues and technologies, industrial source operator perspectives, field and laboratory problem-solving, data management, and data quality issues. The agenda is intentionally comprehensive and designed to support and encourage participation throughout the week.

Attendees include professionals from commercial source sampling and analysis companies, industrial operations, research and equipment development organizations,

and local, state and federal government agencies. You can find conference details and registration information as they develop at http://www.sesnews.org/2011_conference.htm.

SES membership is not necessary to attend the conference. If you are not a member of SES and would like to be included on our mailing list for conference announcements and registration materials, please send your contact information to:

Conference Mailing List
Source Evaluation Society
P.O. Box 12124
Research Triangle Park, NC 27709-2124

Or send an email to ahansen@horizonengineering.com

Questions regarding the conference, arrangements, and payments should be directed to:

Antoinette L. Chartier
SES 2011 Conference Director
(805) 684-1284
e-mail: ALCHMS@cox.net
