

SOURCE  
EVALUATION  
SOCIETY

Mark your calendars:  
April 9-14, 2017 (Sunday–Friday)  
41<sup>st</sup> Stationary Source Sampling  
and Analysis for Air Pollutants  
JW Marriott Tucson Starr Pass  
Tucson, Arizona

The Source Evaluation Society is completing plans for its 41<sup>st</sup> SSSAAP Conference, to be held at the JW Marriott Tucson Starr Pass resort in Tucson, Arizona [www.jwmarriottstarrpass.com](http://www.jwmarriottstarrpass.com). The international conference will include evening and morning sessions, Sunday through Friday, April 9-14, 2017. The conference format includes technical presentations and incorporates ample opportunities for meaningful discussions. The conference offers a unique platform for discussions with emissions measurement professionals from industrial source operations, regulatory agencies, and consulting/engineering/laboratory firms within a highly interactive setting.

Technical sessions will focus on emerging issues resulting from complex interactions between regulatory developments, evolving testing and measurement technologies, industrial source operator perspectives and changing needs, field and laboratory problem-solving, data management, and data quality objectives; all which shape our current reality and the future of our roles and respective disciplines. The agenda of the conference is intentionally comprehensive and designed to support and foster participation.

Attendees include new and experienced professionals from commercial source sampling and analysis companies, industrial operations, research and equipment development organizations, and local, state, and federal government agencies.

Conference details and registration information, as they develop, can be found at:
