(Sunday–Friday)

44th Stationary Source Sampling and Analysis for Air Pollutants Conference

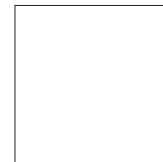

**Sheraton Panama City Beach
Golf & Spa Resort, Florida**

**The SSSAAP
Conference
is back!**

**SOURCE
EVALUATION
SOCIETY**

Our 44th Conference will be an exciting event with excellent technical programs, poster sessions, and interpersonal conversations. During the down time we will offer clay shooting, golf, and volleyball for entertainment. Come join industry colleagues for a great learning experience.

This Conference has sold out every year for 19 years and has a limit of 180 people. **Registration materials will be available at www.sesnews.org by October 1, 2022. Registration opening date will be October 7, 2022.**

This will be our only paper mailing!! To be sure you continue to receive our email correspondence, please unblock the following addresses:

SES/HMS | 6508 Camino Carreta, Carpinteria, CA 93013

Dear Colleagues:

We are excited to let you know that we will be face-to-face again to get updates on industry-related topics. Interest for the SSSAAP conference has grown significantly over the years. The sessions are held in a single meeting room with only one session presented at any one time — a design greatly valued by our attendees. We encourage open discussion in all sessions, and we expect information to flow between the presenter and the audience. The conference has sold out over the last several years by early December; therefore, we strongly advise that you register early.

This year we will have a collection of sessions which include traditional topics as well developing ones. Promoting safety on the job, sharing best practices, and learning new techniques will be fundamental features of the program.

We look forward to seeing you at the conference. Space is limited, so please register early! Best Regards,

Wade Bice
Conference Chair

Tommy Leach
Conference Co-Chair

Overview of the 44th SSSAAP Conference Technical Sessions

- Challenging Sampling Situations and Innovative Test Techniques
- Back to the Basics of Sampling and Analysis
- Particulate Matter Measurements
- EPA Highlights and Updates
- Emerging Compound Measurement
- Reporting: Issues related to Report submissions and subsequent reviews
- Ambient Monitoring Issues
- FTIR Measurements and Data Validation
- Flash Presentations that cover a wide range of topics in a short amount of time
- Job Safety Related Issues and Solutions
- Poster Presentations that allow in-depth information exchange
- NIST and Gas Data Vendor Issues
- Laboratory-Related Issues
- Data Quality Control and Improvement
